

ZERO COST EV CHARGER PROGRAM

Learn about how you can provide AC L2 EV Chargers in your property at Zero Cost through Foreseeson EVSE

foreseeson-evse.com

Charging solutions for everyone

At Foreseeson EVSE, we believe providing low-barrier to entry EV charging solutions to strata corporations, multi-unit residence developers and commercial building owners are vital to our community's sustainability and growth. With more than eight years of EV charging leadership, Foreseeson EVSE is offering to provide turnkey charging solutions for multi-unit residential and commercial applications. Through Foreseeson EVSE's **Zero Cost** program, you can now offer your tenants and visitors convenient charging, deliver economic growth in your organization and be an active environmental steward.

Our Mission

Program Background

Who qualifies for the program?

- Multi-family residential
- Commercial properties
- Retail buildings

As long as your organization qualifies under multi-family, commercial or retail units, we will offer you our “no cost” charger options including project design and installation at no upfront cost to Strata or property owners.

The only requirement is to provide EV-Ready stalls, electric power and Internet connectivity where chargers are needed (40A circuit roughed in for each charger).

Profit Sharing Model

Property owners can expect to begin benefiting immediately after successfully enrolling in the program and installation as Foreseeson EV chargers provide the ability to charge a fee for each charging session. Details and charging policies will be determined by the Strata or by the property owner and Foreseeson. Foreseeson and property owners will agree to participate in profit share program.

Carbon Credit Aggregation

Foreseeson EVSE is a recognized aggregator with the BC Government LCFS branch and has been offering a Carbon Credit Program to EV station owners since 2022. Foreseeson and property owners will agree to share the aggregated carbon credit fund.

Owner Benefits

EV Charger Warranty

Foreseeson will be responsible for normal warranty repairs or replacements covered by the warranty during the terms of the agreement.

Charging Equipment

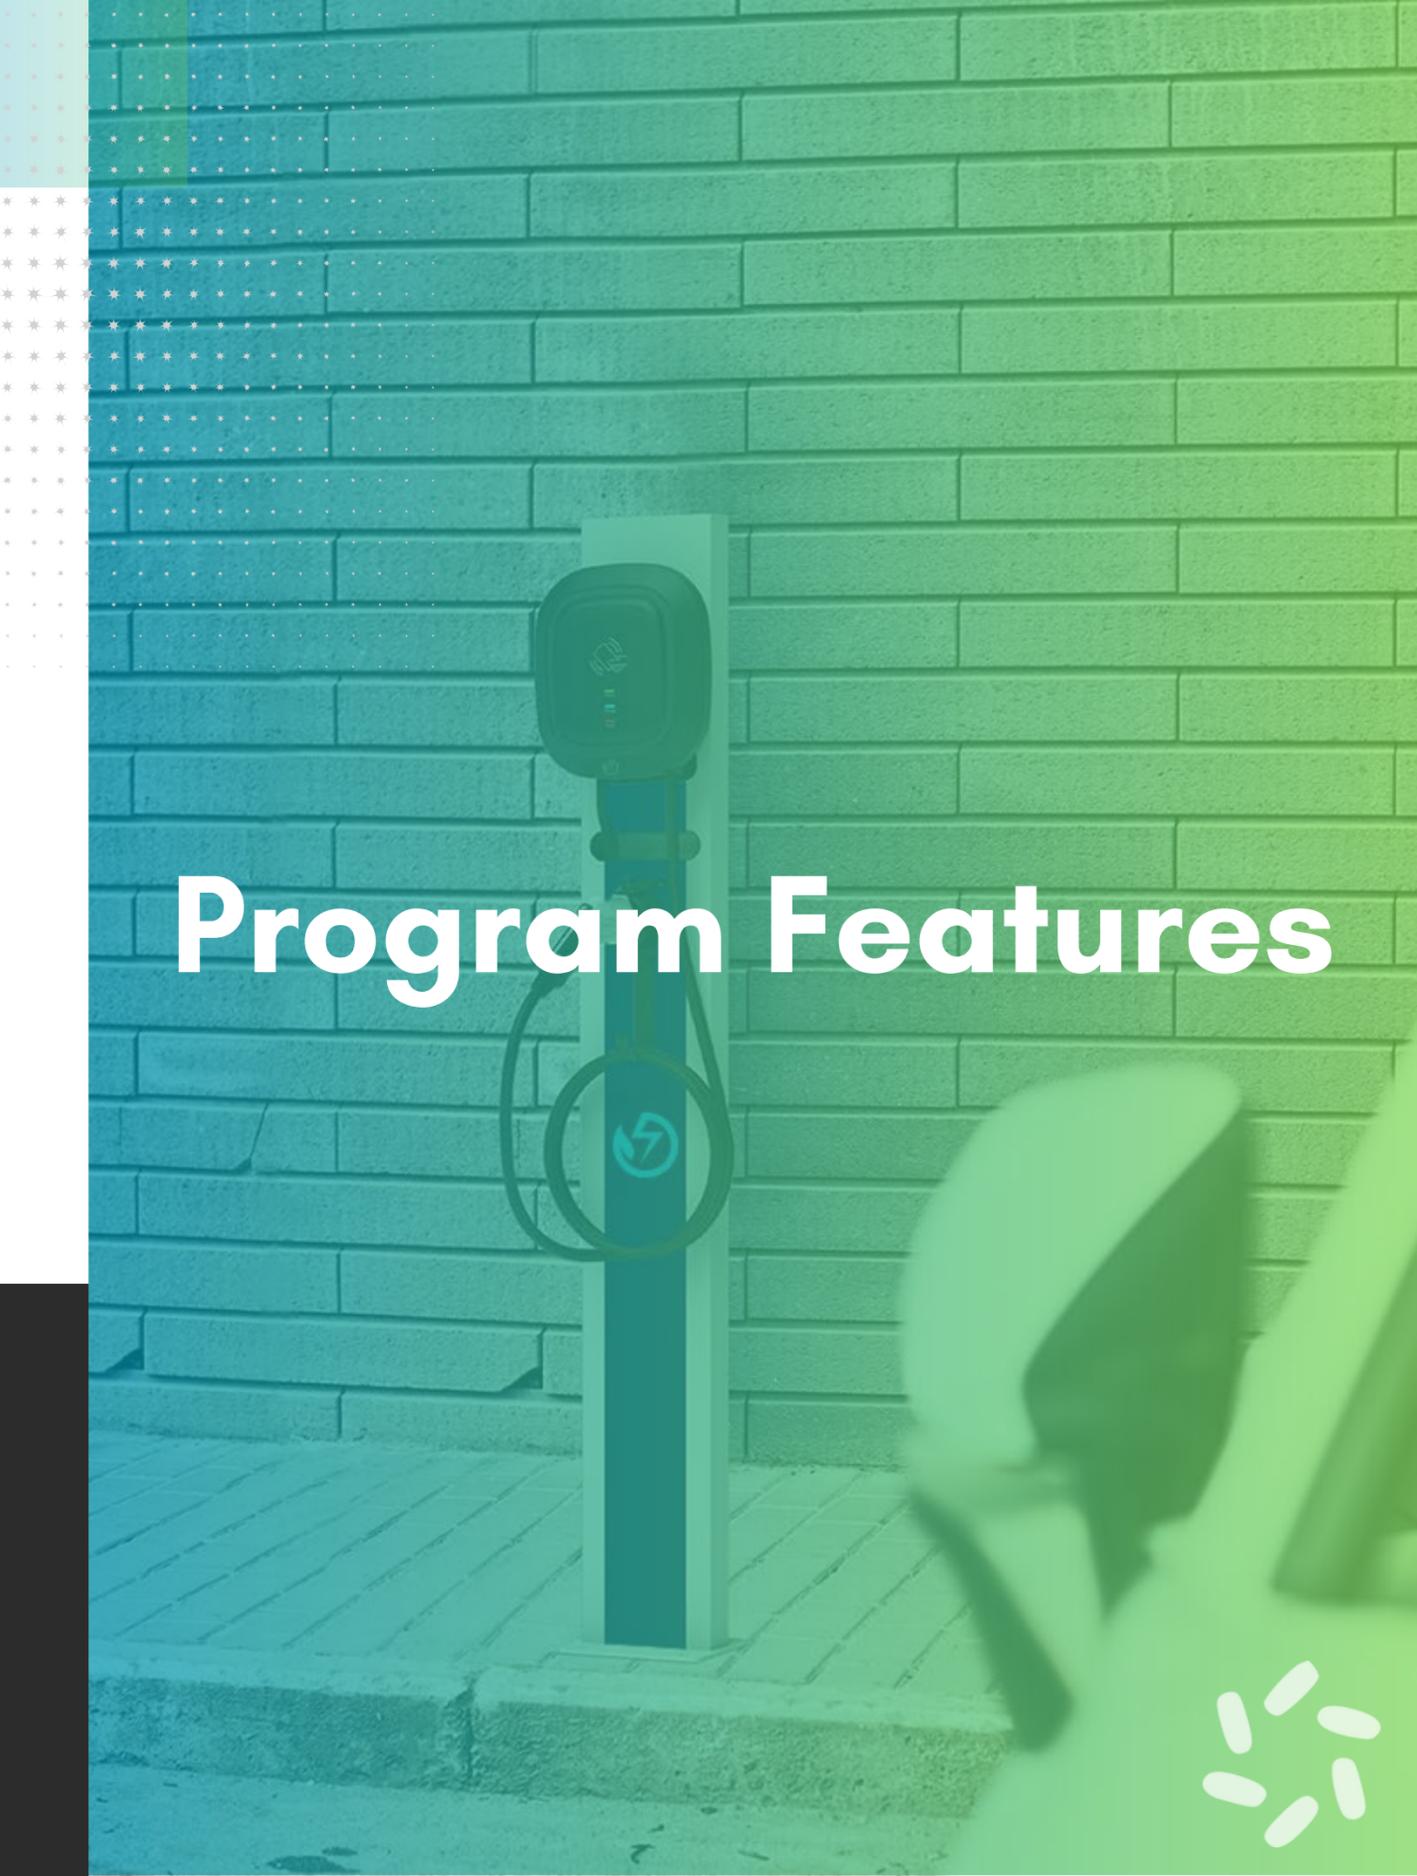

Foreseeson EVSE will provide Level 2 AC charging stations, either in a wall-mount or pedestal configuration.

Maintenance and Security

The Strata Corporation or the property owner will be responsible for maintaining the EV chargers in good condition and in a secured environment.

Upgrading to DC Level 3 Fast Chargers

Contingent upon electrical requirements and demand, Foreseeson will provide hardware upgrade advisory and installation from LEVEL 2 chargers to LEVEL 3 DC chargers.

Program Features

How can I enroll in the program?

- 1 Contact one of our EVSE Sales Specialists to apply for our Zero Cost EV Charger Program today!
 - email: evse@foreseeson.com
 - website: www.foreseeson-evse.com
- 2 Complete application form and requisite surveys provided by agents.
- 3 Foreseeson EVSE and owner parties will discuss details including the number of stations required, building and electrical assessment and internet connectivity.

*Acceptance of the application of Zero Cost EV Charger Program will be at the sole discretion of Foreseeson EVSE.

*Our installation will include all necessary equipment, labour and materials required for a complete and functional charging system.

Enrollment Process
